Students learned...

- All the different agricultural careers.
- Meteorites are heavier than they look.
- Old semi-trucks polluted a lot more and they fixed that.
- That life has a lot of options.
- That CAD is fun.

Teachers said...

- I can't thank your team enough for this, this is really going to change things for some kids.
- What a great opportunity to be able to offer our students things they would not normally have the chance to witness.
- The hands-on projects were amazing. This was so much more than what I can do in my classroom.
- The sessions were all great – so much hands-on.
